

Post Kidspiration Projects to the Web

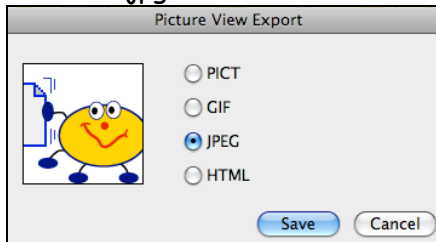

Students can save their Kidspiration projects as a .jpg to be used on the web site in iWeb.

Save as an Image:

- Open the Kidspiration project.
- From the File Menu, select Export.

- Click on .jpg

- Type a name for the image and select where you want to save it.
- The image will save in the documents folder with the .jpg at the end.
- Once it is a .jpg, you can then just drag it into most any project, or drag it into iPhoto as part of your photo library.
- Students can share it with the teacher in the *Groups Hand IN* folder.
