

Harvesting Graphics from the Web

Most word processing or multimedia programs allow you to simply drag a photo from the web page to the document. (Appleworks, Microsoft Word, Kidspiration, WebBlender, and Keynote)

- With your document open, go to the web page that has the image you wish to use.
- Click and drag the image to your document.
- You may have to resize the image by dragging the handles.

Always cite your image source.

You can also drag the URL to the document.
