

Macintosh iBook with OS X Panther: Sherlock

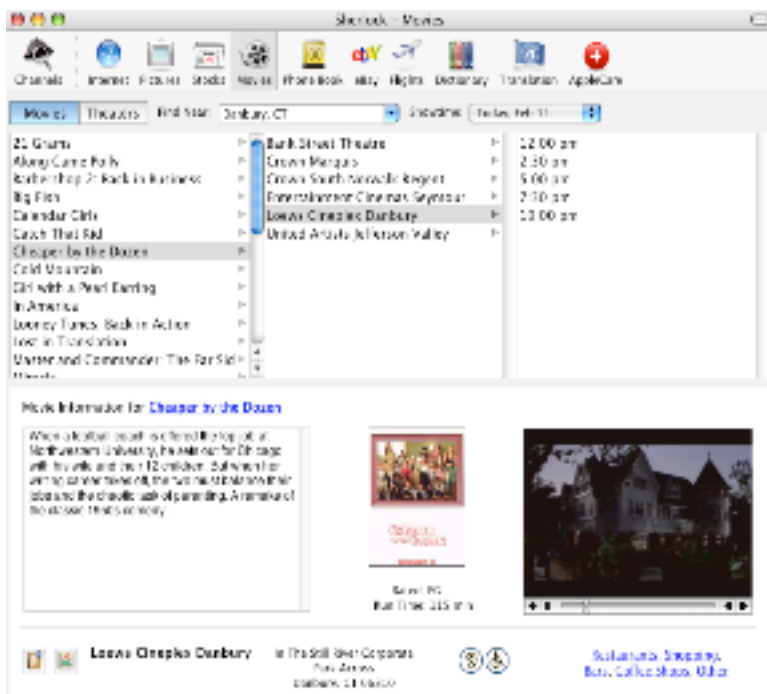

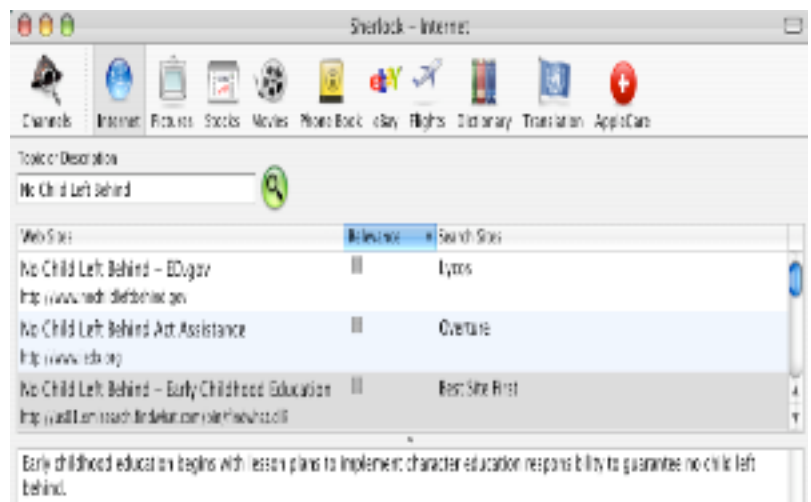

Use Sherlock to find information available from web services. You must be connected to the Internet to use Sherlock.

Internet Channel - this search tool produces a list of web sites and a short annotation of the site.

Pictures - type in a topic and Sherlock will find pictures of the topic. Double click the picture to go to the web site where it was found..

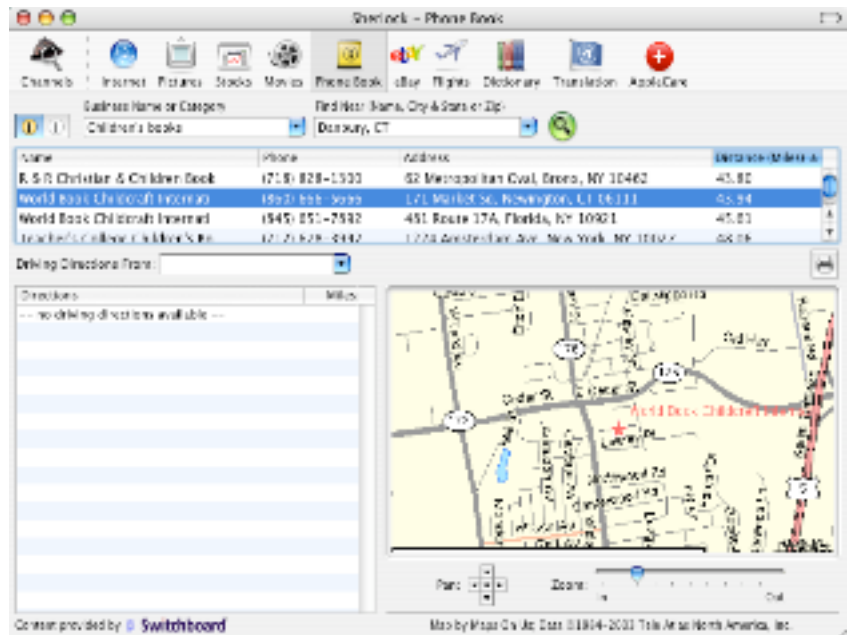

Movies - select a city and find all the movies available in the area, theaters, show times, review of film, and even the preview of the movie.

Dictionary - provides definitions, synonyms, and links to the synonyms.

Phone Book - type in the type of business or service you need. A list of businesses will appear along with a map.

To get the driving directions, you must type in the Driving Directions from the starting address.

Translation - type the original text and select to translate from English to one of 12 languages or from one of 12 languages to English.
